

Top 5 Jobs

1. **Defense contractors** (Lockheed Martin, Northrop Grumman, Raytheon): Government-like benefits with higher pay for tech roles

- Does the job require the current stack that you know. Would you have to learn new skills? This is a very high end dream job, doing government contract work will required many more years of study and learning so many new skills. I do not have anywhere close to the needed skills for this job, yet.
- What goals would you like to achieve in the hypothetical position? If I were to get this position I would basically be set for life, good benefits, great pay and not having to work till the day I die.
- Do you currently have the skillsets for the job? No, it would require well over a decade of studying new concepts and frameworks to get the where I would need to be to secure this type of job.
